Ok I have posted this before and did not get the answer I was looking for so i will explain it again.

Whenever there is a syntax error, or parse error etc in php it does not display the error. ie

Warning: main(/includes/file.php):failed to open stream blah blah
blah

I dont get these errors at all (even though they are there!) all i get is either nothing or a server 500 error. What the problem? .ini issue?

please help

ta

.
