> *whether the IP is in the range of 10.8.4.\* or 10.8.5.\*. Any suggestions?*

```
$ipArray = explode( '.', $ipAddress );  
  
if(( $ipArray[0] == 10 ) &&  
    ( $ipArray[1] == 8 ) &&  
    (( $ipArray[2] >=4 ) && ( $ipArray[2] <=5 ))) {  
    echo 'Access granted';  
  
} else {  
    echo 'Get lost, ya bum!';  
  
}
```
