Hello

My name is Lara Thynne and I am a PhD candidate at Deakin University Australia.

I am currently running a survey at the following address.

<https://dcarf.deakin.edu.au/surveys/oss/>

The survey is completely confidential and looks at your views and motivations to use Open Source software and to participate in the community.

It will only take a few minutes and your contact details will not be recorded. You can withdraw your participation at any stage.

I sincerely apologize for the spammish nature of this e-mail – I don't mean to abuse this list. I am trying to collect responses from as many open source developers and users as possible and a mailing list like this is probably the best way to reach many of you.

Please personally CC me with any questions/comments posted to the list in response.

Thanks again

Lara

P.S The program that I am using is open source, of course ([www.phpsurveyor.org](http://www.phpsurveyor.org))!

.

Your input would be appreciated.
