

How to log APC Cache errors?

Source: <http://coding.derkeiler.com/Archive/PHP/php.general/2008-03/msg01052.html>

Hi.

I'm using APC 3.0.17 with PHP 5.2.5 on Linux.

I'm suffering some "white page of death" APC errors, and I'm trying to investigate the reasons. But:

- 1) I don't find any APC support forum.
- 2) I don't find any APC error log. I'm browsing Apache error log (with PHP 'E_ALL' activate) and don't see any line about it.

Any suggestion is welcome. Thank you very much.

.
