Hi,

I am making an HTML email. I have 3 images to put in. Currently I have

```
$body .="  
<table>  
<tr>  
<td><img src=\"image1.jpg\"></td>  
</tr>  
  
<tr>  
<td></td>  
</tr>  
</table>  
";
```

ideally I would like to have

```
$myimage1 = "image1.jpg";  
$myimage2 = "image2.jpg";  
$myimage3 = "image3.jpg";
```

and put them into the HTML body variable. I have tried escaping them in every way I can think of, dots and slashes and the rest. Any ideas?

Ross

My first idea is to ask you what you WANT exactly and what's wrong with what you have. Currently you're showing 1 string, and 3 variables. Nothing else... what do you expect to happen that is not happening? Or what do you expect not to happen that IS happening ?

[PHP] Re: putting variables in a variable

I think it's fuzzy thinking.

He probably wants:

```
$body .="  
<table>  
<tr>  
<td><img src=\"\$image.jpg\"></td>  
</tr>  
  
<tr>  
<td></td>  
</tr>  
</table>  
";
```

Where \$image.jpg is "image1.jpg" or "image2.jpg" or "image3.jpg"

Cheers,

tedd
