

does function extract() trim?

does function extract() trim?

do not laugh, but I "discovered" today function
extract(); :D

before I used:

```
foreach ($array as $key => $value)
{
  ${$key} = trim($value);
}
```

though, "trimming" \$value is kind of important to me
and I would like to know if extract "trims" too?

thanks.
