I need to re-address this.. tedd your original code works fine over here; as does the code I sent you, and the code jay submitted first..

do us a favour, copy and paste exactly what I just handed through and run it; are the results correct?

To all:

The code provided by nathan works for me as well. However, the problem is not easily explained, but I can demonstrate it — try this:

<http://www.webbytedd.com/zzz/index.php>

* A complete listing of the code follows the demo.

When the code is first loaded, the session variables are defined and populated. Proof of this is shown in the top left corner of the page, which reports:

```
Cable Diane
Ron Big
Dirt Joe
```

Now click the "Continue" button and you will be presented with the next step which shows a list of the SESSION variables in both the top left corner AND immediately below "Step 2". Everything is righteous to there.

However, the next portion of the code is the foreach loop where the first SESSION pair is output correctly, but the rest aren't.

This is followed by another listing of the SESSION variables and this time it shows that they have completely

[PHP] Re: SESSION array problems UPDATE

disappeared.

Okay gang -- what's up with that?

Cut and paste the code and see for yourself.

Cheers,

tedd
