Should be lower case s.

```
> use LPW::Simple;
```

I don't believe this module exists, so your code does not compile.

```
> print "Content-type: text/plain\n\n";
```

Why use the CGI module and print your own headers?

```
> foreach $var (sort keys %ENV) {
```

Global symbol "\$var" requires explicit package name at

```
> print "$var=\"$ENV{$var}\"\n";  
> }  
>  
> @values = split(/&/,$ENV{'QUERY_STRING'});
```

Global symbol "@var" requires explicit package name at ...

There are many more errors. I can't be bothered to point them all out.
Needless to say the code does not compile.
