I am trying to set up a script that will do the do a current time -1 routine.

Examples:

Current Time:  
mmddy:hhss  
052804:1030

Output:  
052804:0930

Current Time:  
052704:0015

Output:  
052604:23:15

I think the `add_delta` module is where I need to go, but I have never used modules before.
