Sergio Ulises Sanchez Buelna [SUS], on Thursday, May 5, 2005 at 11:40 (-0500 (CDT)) wrote the following:

```
SUS> follow_link (this one does not work for the same reason presented before) and
SUS> "javascript:mySubmit( 2, 're_search', 25) "
SUS> on this reference
SUS> <a href="javascript:mySubmit( 2, 're_search', 25) ">previous</a>
```

you have to know, how to javascript function create URL (where are you redirected), after that, you can parse the source for javascript, recreate the links and use \$mech->get(). that's all

...m8s, cu l8r, Brano.

[Honest, Officer, it didn't look like that when I wrote it!]

.
