ORA-03113 is a kind of "catch all" error. The real problem will be defined in your alert<SID>.log file.

Subject: Ora-03113 using 9iclent against 817 db

Dear friends,

I have the following issue and wondering if you can help me:

I am using Perl / DBI / DBD-Oracle on a Fedora box to connect to our 817 database (on win2k server). DBI/DBD::Oracle has been built against Oracle 9.2.0.1 on linux. It connects and is able to select from local tables, but selecting from another database across a database link causes ORA-03113 error.

SQL*Plus does not do this --- only DBD::Oracle does.

Thanks for any input,
George Zhang
