Hi Tim,

Is there a documented set of procedures to load DBI::Oracle and DBD::Oracle to Sol9 with the Oracle 9.2.0.X CLIENT using the perl that comes with Solaris (5.6.1)?

I can get DBI in just great but can not get DBD to go! I used DBI-1.4.2 and have tried DBD-1.13 to 1.15. I loaded a trial of Sun's compiler suite to get this in. (My boss does not want me to use gcc.)

I am getting a complex over this! I have a dba breathing down my neck.

Thanks in advance for any help you can provide.

God bless,

Paul Whitener
