Hi,

Trying to compile the PythonCE (Validus Medical Systems Python 2.3.4) using eVC++ 4.0 and the Smartphone2003 SDK. Linking is generating 28 errors. I dug into the first one (PyErr_Fetch) and it's in pyerrors.h so I don't see why it misses it.

Anyone have an idea?

TIA

Sean

Deleting intermediate files and output files for project 'python – Win32 (WCE ARMV4) Release'.
